1 Find Possible Repeat Users

A short script to locate any possible repeat opioid users. There were none.

```
[ ]: import pandas as pd

df = pd.read_csv("../data/interim/merged_df.csv")

[ ]: # Finds if there are instances where there is a repeat victim on different days
[g["incident_id"] for _, g in df.groupby("victim_id") if len(g) > 1 and
↪len(g["incident_id"].unique()) > 1]

[ ]: []

[ ]:
```
